1. Rules of the game

The game is intended for one person, but nothing prevents playing in a small group, it will be much more fun.

The game is compatible with recent versions of web browsers. Otherwise the game can be slow.

A game session typically lasts between half an hour to 2 – 3 hours. You can play as many times as you like during your 60-day access and learn a lot about the ISO 50001 standard.

The goal of the game is to reach the final space (Finish) as quickly as possible.

The standard's requirements and comments are on this [page](#). A free quiz on the ISO 50001 requirements is provided at the beginning. This allows you to discover, decrypt and become familiar with the requirements of the standard.

Having a copy of the ISO 50001 standard at hand (not provided with the game) is a prerequisite.

The board of the game is a city with a car's journey.

In the top left, there is a clock showing elapsed time. In the top right, you have a help button and option to exit the game.

At the bottom left, there's a button to mute the sound. In the bottom center, you can see the total stars you've earned. ★ At the bottom right, there's a button linking to the ISO 50001 standard requirements page.

At the beginning, the car is parked at the Start space. ➡

Click on the "START GAME" button to begin.

The sequence of spaces (types of cards) is as follows:

- RISK - threat or opportunity - silver
- MCT - multiple choice test - green
- PRACTICE - good or bad practice - orange
- CASE – situation, challenge and solutions - blue

You also have special Maintenance

and Pandora's box spaces

Each type of case includes 50 questions (cards), and each answer is linked to a paragraph of the ISO 50001 standard version 2018.

Each card is presented in the following steps:

- step 1: The back of the card showing the card type, number (from 1 to 50) and the number of stars (from one to three) in blue, white and red ★☆☆☆☆

- step 2: The card type, its number, the question (e.g., “Is the following statement more of a threat or an opportunity?”), the statement (e.g., “The scope of the EnMS describes the company’s main activities”) and the star(s)
- step 3: The answers (one or more correct answers are possible) with a green emoji (for **all** correct answers) and a red emoji (for a wrong answer)
- step 4: The paragraph from the standard and a comment for the correct or incorrect answer

The car starts and arrives at the Risk space.

The card number is random. Depending on the question’s difficulty, the stars are one, two or three.

If you guess the correct answer, the car moves forward as many spaces as there are stars on the question.

If you don’t guess the correct answer (or answer partially) the car stalls on the same space, and the next card will be of the same type.

If you land on a Maintenance or Pandora's box space, you may get lucky or unlucky. From the car’s trunk or Pandora's box comes a random luck or misfortune card. If

luck is on your side, you get Joker card, and your car moves forward 3 spaces. If

misfortune strikes, your car moves back 3 spaces.

If a second person is with you and has printed this booklet, they can increase the game’s difficulty by asking questions like:

- What is the clause and sub-clause (paragraph) of the standard related to the question?
- Can you provide an example from your department related to this question?

When you reach the Finish space for the first time, you can download your IZOGOOD®

50001 game participation Certificate.

You can also view your game results:

- number of stars earned ★
- date and time each time you played 📅
- time spent ⌚

The educational objectives of the game are to allow each player to:

- identify whether a risk is more of a threat or an opportunity

- enhance their knowledge of the standard's requirements through MCTs
- guess whether a statement is a good or a bad practice
- study each proposed case's situation, challenge, and to find the right solution (one or more correct solutions are possible)
- decrypt the clauses and paragraphs of the standard and assimilate the requirements

Some questions have a touch of humor (even if the boss forgot to say it).

Relax, it's just a game.

A bias is inevitable regarding the "correct answers" to retain, especially for RISK or PRACTICE cards.

Here's an example:

RISK 01. Is the following statement more of a threat or an opportunity? **"The most important thing is that the company's strategy was established in the past"**

One might answer that it's a threat or an opportunity, but it depends on when the strategy was defined.

If you answer that it's a threat, you're right because it's not specified when the previous strategy was developed (a year ago, 10 years ago). There's missing information. But you could answer that it's an opportunity because you think "in the past" means 2 to 3 years ago.

Thus, the presented answers and the relevance of the comments are debatable; in the end, the truth is sometimes relative.

The IZOGOOD® game was created and developed with great care. Thank you in advance for communicating any potential improvement points you've identified via the link: <https://www.pqbweb.eu/contact.php>

2. Glossary

The beginning of wisdom is the definition of terms. Socrates

Some specific terms:

Competence: *personal skills, knowledge and experiences*

Conformity: *fulfillment of a specified requirement*

Corrective action: *action to eliminate the causes of nonconformity or any other undesirable event and to prevent their recurrence*

Customer: *anyone who receives a product*

Customer satisfaction: *top priority objective of every quality management system related to the satisfaction of customer requirements*

Document: *any support allowing the treatment of information*

Effectiveness: *capacity to realize planned activities with minimum effort*

Efficiency: *financial relationship between achieved results and used resources*

Energy baseline (EnB): *quantified reference of energy performance*

Energy management system (EnMS): *set of processes allowing energy objectives to be achieved*

Energy manager: *leader in the journey towards energy excellence*

Energy objective: *energy related, measurable goal that must be achieved*

Energy performance: *measurable result of energy consumption, use and effectiveness*

Energy performance indicator (EnPI): *value of a parameter, allowing energy performance to be measured*

Energy review: *analysis of energy performance to identify opportunities for improvement*

External provider (supplier): *an entity that provides a product*

Indicator (target): *value of a parameter, associated with an objective, allowing the objective measure of its effectiveness*

Management system: *set of processes allowing objectives to be achieved*

Nonconformity: *non-fulfillment of a specified requirement*

Organization (company): *a structure that satisfies a need*

Procedure: *document describing the actions to be taken to carry out a process*

Process: *activities that transform inputs into outputs*

Product (or service): *every result of a process or activity*

Quality: *aptitude to fulfill requirements*

Quality management: *activities allowing the control of a company with regard to quality*

Requirement: *explicit or implicit need or expectation*

Risk: *likelihood of occurrence of a threat or an opportunity*

Significant energy use (SEU): *significant part of consumption with potential for improvement*

Stakeholder: *person, group or company affected by the impacts of an organization*

Top management: *group or persons in charge of the company's control at the highest level*

Remark 1: the use of ISO 50001 is recommended. The most important thing is to determine a common and unequivocal vocabulary for everyone in the company.

Remark 2: a document can be presented as documented information that must be maintained (procedure ) or retained (record ).

3. RISKS

Recurring question: Is the following statement more of a threat or an opportunity?

RISK 01 The most important thing is that the company's strategy was established in the past

Threat § 4.1 ★★★

Every three years on average, it's advisable to verify the strategy's adequacy with the company's context and the expectations and needs of stakeholders. It's a threat because the date when the strategy was developed isn't specified

RISK 02 The company's context is an element that can be considered (even if the boss forgot to mention it)

Threat § 4.1 ☆☆☆

This is a requirement of the standard and is unavoidable. It's one of the first tasks to carry out since the validation of the company's strategy depends on it

RISK 03 Trying to anticipate changing stakeholder expectations regarding energy performance is a waste of time (if the boss says so)

Threat § 4.2 ★

The company's objective being, among other things, to optimize its energy performance, knowing the evolution of stakeholders' expectations is a key success factor for the future

RISK 04 We can try to comply with legal requirements (if the boss agrees)

Threat § 4.2 ★

We must strictly comply with legal requirements

RISK 05 The scope of the EnMS describes the main activities of the organization

Opportunity § 4.3 ☆☆☆

Describing the scope of the EnMS is delimiting the entities and activities concerned. Exclusions must be specified

RISK 06 Promote process mapping internally (the boss said to manage on our own)

Opportunity § 4.4 ★

This is an opportunity to let everyone know about process mapping. This allows everyone to situate themselves in the overall operation of the organization and in supplier customer relationships with other processes

RISK 07 To check whether top management is demonstrating leadership, it is necessary to audit top management

Opportunity § 5.1 ★★★

*It is an opportunity when the director leads by example
But it can be a threat when the director is insincere*

RISK 08 Involve staff in the daily application of the energy approach (even when the boss is not around)

Opportunity § 5.2 ★

When staff is involved on a daily basis, operational effectiveness of the EnMS is enhanced and continual improvement is possible

RISK 09 The energy policy is determined independently of the strategic direction (anyway we've always done it like that)
