

I, the undersigned, [first name and surname], declare that I have no ties or affiliations—whether personal or professional—that could exert an actual, potential, or apparent influence on my judgment or actions in my capacity as [position] at the [name of entity] laboratory.

I declare that I have read the Haute Autorité de Santé (French National Authority for Health) Code of Ethics guide: "Declarations of interests and management of conflicts of interest."

This declaration serves to reiterate the principles of ethical conduct, impartiality, and confidentiality by which the laboratory carries out its duties in the interest and for the well-being of the patient.

All patients receive care that is compassionate, equitable, and free from discrimination or prejudice. The same applies to their samples. Urgent analyses are prioritized, and results are issued as quickly as possible.

As a member of the laboratory staff, I must disclose any obligation, commitment, relationship, or interest that could constitute a conflict of interest—or be perceived as such—in the course of my activities.

I declare that I act solely in the patient's interest and am not subject to any undue pressure or commercial, religious, or financial influence that could compromise the quality of their results.

I undertake to declare any conflict of interest that may arise in the course of my activities.

I undertake to avoid situations where a conflict of interest could affect my professional activities. Should such a situation arise, I undertake to declare it without delay. I undertake not to grant, seek, or accept any benefit—financial or otherwise—in favor of or from any person that constitutes an illegal practice or an act of corruption (whether direct or indirect) as an inducement or reward linked to the laboratory's activities. If, after signing this declaration of no conflict of interest, there is any change to the information provided, I undertake to report any change in my situation in this regard.
